

# Palm Island [↗](#)

Caribbean, St Vincent and The Grenadines

Private Caribbean island in the stunning Grenadines

We love..

the tropical hideaway ambience of this private island resort.

The tiny Palm Island in The Grenadines is a private island resort experience of a lifetime. Only accessible by boat, it's an adults-only, all-inclusive, eco-friendly paradise of dazzling white sand beaches fringed by coconut palms, breathtaking seascapes and tropical landscapes. Surrounded by the Caribbean Sea, Palm Island has no less than five sandy beaches. It also has a swimming pool with cascading waterfalls, two bars, two restaurants, a vast range of activities and can organise (at an additional charge) snorkelling and boat trips to the nearby Tobago Cays. Relaxing massages and beauty treatments at the Tranquility Body & Soul Spa are at your disposal too, keeping you feeling more cast-worthy than castaway. Accommodation is available in various forms (guest rooms, suites, stilted cottages, villas) however, all are air conditioned, have a balcony or patio and feature original artwork alongside rattan and bamboo furnishings. For the ultimate Palm Island experience book one of the villas located at opposite ends of the island, tucked away among shady palm trees and colourful gardens just a few steps from the sand. Your dining options: gourmet meals at the Royal Palm Restaurant; local and international fare at casual Sunset Grill; picnic lunches in secluded designated spots; private dinners on the beach.
